Manufacturing
Trebro

At Trebro, we extend a promise to every one of our customers to provide "Responsive After The Sale Service" - and we mean it. We fulfill this promise by employing the best service technicians in the turf industry, offering the highest quality original parts at the best prices, and by providing 24 hour a day, 7 days a week professional phone service support at NO CHARGE to you.

THE TURF INDUSTRY'S BEST PARTS AND SERVICE

There are many reasons to trust only Trebro for your service, support, or parts on your turf harvesters:

- Free over-the-phone service calls 24 hours a day, 7 days a week
- The industry's best service technicians
- We place the highest value on customer satisfaction
- Superior quality parts made by the original manufacturer
- The best parts pricing
- Fast shipping from our fully stocked parts warehouses in five locations around the world
- The integrity of the highly respected Trebro name
- 13 years of knowledge and expertise in manufacturing automatic turf harvesters
- Our family owns and fully understands the need for efficiencies on a turf farm
- We have worked hard to make our family turf farm successful since 1978
- We accept all major credit cards

THE TREBRO VALUE LINE

To help our customers keep their parts costs down, we have introduced the Trebro "Value Line". This selection of original manufacturer's parts represents a broad assortment of components our customers need most frequently for their AutoStack, HarveStack, and AutoSlab turf harvesters. By identifying these higher volume replacement parts, we can build them in larger quantities and pass the cost savings on to you. This will help your bottom line and keep your machine running with the best original parts made exclusively by Trebro!

Taking care of our customers is the highest priority at Trebro and we dedicate a lot of time and resources to customer service. As operators of our own family turf farm, we understand that downtime is very costly so we go the extra mile to help keep your equipment up and running. If you

have any questions or concerns, please feel free to contact us by phone at 888-395-5867, or through our website at www.trebro.com.

Ted, Mike, Gregg, and Don Tvetene

At Trebro, our service and support is second to none because our service technicians are absolutely the best in the industry. They have achieved this level of expertise by spending hundreds of hours operating and studying the mechanical innovations of the Trebro turf harvesters. This advanced training allows them to quickly troubleshoot problems, and get your equipment up and running as quickly as possible.

EXPERTISE

MEET OUR TREBRO SERVICE TECHNICIANS

COLE BUECHLER, Trebro Service Manager

Cole has been delivering top notch technical support to Trebro customers since 2004. With a degree in Diesel Technology, Cole brings a wealth of knowledge to our service team. Prior to joining Trebro, he worked for 10 years in the Agricultural Industry and 2 years as a mechanic with a tractor dealership.

TERRY MILLER, Trebro Service Technician

Terry has been serving customers and part of the Trebro team since 2002. Terry worked for 8 years in the field of Engineering Design and New Product Development before coming to work for Trebro. In addition to his 20+ years of practical experience, he also worked for 2 years in turf farm - production.

DENNY MADDUX, Trebro Service Technician

Denny has been helping Trebro customers with their machines since 2005. With his degree in Agricultural Engineering Technology, Denny understands the importance of keeping equipment up and running. Prior to joining Trebro, he worked for 13 years in agriculture, construction and sod farming.

MARK SOUTHCOAT, Managing Director Trebro UK

Mark has been employed by Trebro since 2003 and now oversees our UK operations. Before joining the team at Trebro, Mark worked for 15 years in the turf production industry, which included new product design. His past experience as an Engineering Fitter Apprentice has helped Mark become a solution-driven technician.

RELIABILITY

Turf producers worldwide are experiencing improved efficiency and significant cost-savings by utilizing Trebro's industry-leading harvesters on their turf farms. Millions of pallets of turf have been harvested using Trebro's revolutionary technology and that number grows every day.

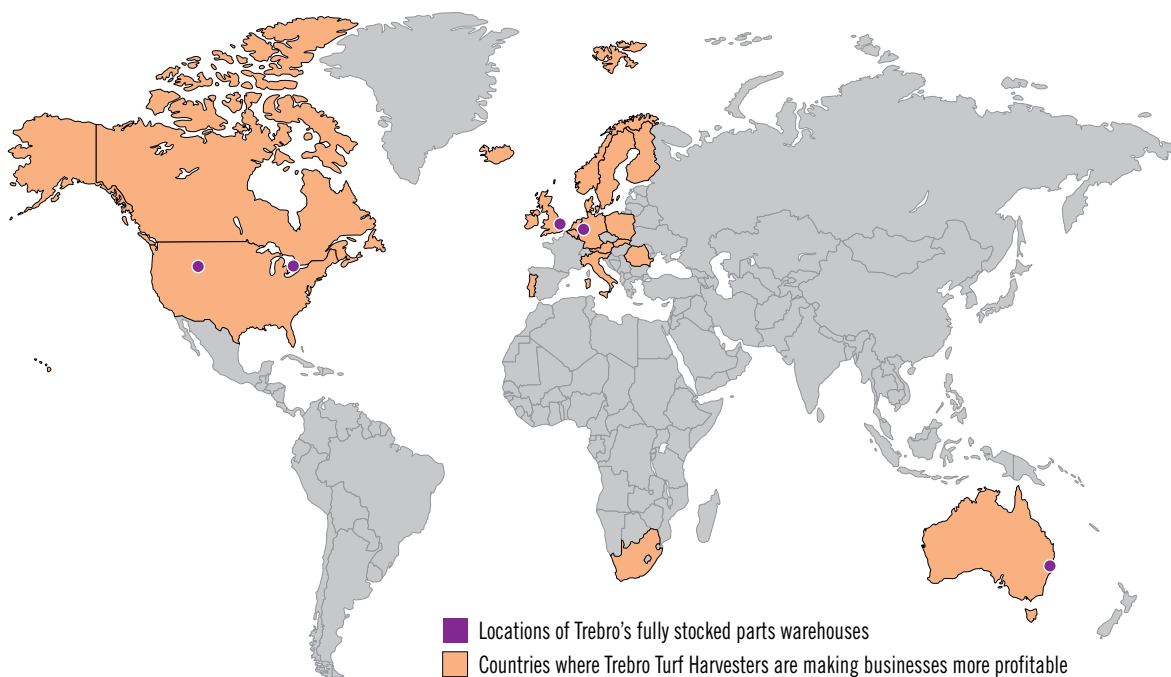

HOW THE TREBRO REVOLUTION STARTED.

The initial concept for our turf harvesters began back in 1990 on the Tvetene Turf Farm near Billings, Montana. Having been a family-owned turf farm in the Yellowstone River Valley since 1978, we understood the production needs of turf growers and the importance of having reliable harvesting equipment that could get the job done in a limited turf season.

In 1990 as demand for our turf increased, we struggled to keep up with orders because of critical labor shortages. Out of necessity, we took matters into our own hands and began designing an automatic turf harvester to meet our needs. With our in-the-field experience, hard work ethic, and nine years of continual engineering and testing, we perfected the "AutoStack" as the industry's first successful automatic, stacking turf harvester. With the machine finalized, we started Trebro Manufacturing, Inc. in 1999 and our first AutoStack's began rolling off the production line later that year.

The AutoStack was an instant success as turf producers around the world were eager to take advantage of its increased production, labor savings, and improved quality of finished turf pallets. The AutoStack revolutionized the industry by allowing one man and one machine to easily cut and stack superior quality pallets without ever leaving the cab. Since 1999 our product line has grown and we have sold almost 700 fully automated turf harvesters to producers in 22 countries around the world. This success has made Trebro the most respected name in the turfgrass industry. The equipment we build is durable, reliable, and highly productive, which will help you reduce labor costs and improve your bottom line.

BACKED BY THE INDUSTRY'S BEST SERVICE!

At Trebro, our promise is "Responsive after-the-sale service" - and we mean it. Our service and support is second to none, and we are continually looking for ways to better serve our customers. Trebro service technicians are the best in the industry and they are available 24 hours a day, 7 days a week to answer your service questions at NO CHARGE to you. They are highly trained experts who understand how to quickly troubleshoot problems, and get your equipment up and running as quickly as possible.

If you need parts, we will get them to you fast. We ship out of five fully stocked warehouses located in:

- Billings, Montana
- Seaforth, Ontario, Canada
- Newmarket, England
- Amersfoort, The Netherlands
- Freemans Reach, NSW, Australia

LOOKING FORWARD.

Our team at Trebro is committed to ongoing product research and development that will help turf growers around the world run more profitable and streamlined operations. As a result of our Trebro turf harvesters and decades of hard work, Tvetene Turf Farm has grown into one of the Northwest's largest and most respected turf farms. This hands-on experiences give us a big advantage as we work to develop new technology for our customers.

While we have received numerous awards for our technology, there is nothing more satisfying than hearing the hundreds of success stories from our customers as they experience higher profits with less stress. They express their appreciation for getting more time with their families, and they constantly tell us how much they enjoy operating our equipment and working in the field. When you factor in these incredible customer satisfaction levels with our unmatched "Responsive after-the-sale service", there really is no reason to buy any other turf harvester than a Trebro.

We invite you to give us a call and find out how you can join the Trebro Revolution by adding one of our innovative turf harvesters to your operation. Our knowledgeable team of professionals is standing by to help you determine which of our fleet is best suited to increase your productivity and profitability. Additional technical brochures and informational videos are available upon request.

Our family appreciates the loyalty of our customers and welcomes any feedback you may have regarding our equipment and customer service. Please feel free to contact us by phone at 888-395-5867, or through our website at www.trebro.com.

GET YOUR PROFITS ROLLING!

No machine boosts productivity and profits like a Trebro!

AutoStack II

Ultimate Performance Automatic Roll Harvester

The revolutionary AutoStack II is packed with new high performance features that set it apart even further as the ultimate, one-man turf harvesting machine.

In today's challenging business climate, efficiency is the driving factor for success. Trebro makes it easier for turf producers to succeed with our innovative, hardworking harvesters that reduce your labor costs while generating greater profits. All three of our machines provide state-of-the-art cutting capabilities, unmatched productivity, and the industry's most proficient automatic stacking system.

No one harvests innovation like Trebro.

Trebro Manufacturing
The Future of Turf Harvesting

SC2010 Slab
